Accenture

ACIC Rome brings together Accenture's deep technical know-how and industry expertise to help companies deploy cloud to transform their journey to cloud. At a time when innovation is racing ahead, Accenture is broadening its collaboration with leading cloud solution vendors to have instant access to the level of specialist services that can help meet our clients' specific business objectives. At ACIC Rome, **we bring together** not only the major technology vendors but **the best offerings** from emerging providers in step with market evolutions. Our clients benefit from the very latest real and tested solutions.

About Dell Technologies

How we innovate.

Insights — **Win in Core** — **Innovation**

Insights — **Win in Growth Areas** — **Innovation**

Grow and modernize the core business

- PC
- Computer & Networking
- Storage
- APEX

Build new growth businesses where we have a unique right to win

- Edge
- Multi-cloud Service Delivery
- Telecom
- Data Mgmt.
- Other New Businesses (e.g., Security & AI/ML)

We create technologies that drive human progress

Our story began with a belief and a passion: that everybody should have easy access to the best technology anywhere in the world. That was in 1984 in Michael Dell's University of Texas dorm room. Today, Dell Technologies is instrumental in changing the digital landscape the world over.
We are among the world's leading technology companies helping to transform people's lives with extraordinary capabilities. From hybrid cloud solutions to high-performance computing to ambitious social impact and sustainability initiatives, what we do impacts everyone, everywhere.

We are driven by the world we want to live in

Leading is nothing new for us. That's why advancing sustainability, cultivating inclusion, transforming lives and upholding ethics and privacy are embedded in everything we do. Powered by a workforce that values and celebrates different backgrounds, we create solutions that harness and amplify technology in the most meaningful ways. From healthcare to education to a digital economy, we believe in the power of technology to help solve complex societal challenges.

Thrive with the confidence of cyber resilience

Expanding attack surfaces and increasing threat sophistication demand a modernized approach to cyber resiliency. Dell leverages the breadth and depth of its end-to-end IT ecosystem presence to develop security solutions that are designed to provide confidence, control, and scale for your security posture.

The Partnership with Dell Technologies

Dell Technologies has partnered with ACIC to prototype solutions mainly focusing on its product: PowerProtect Cyber Recovery Solution.

Infrastructure Engineering

Infrastructure Cyber Resiliency

Context and client challenges

- Ransomware is a type of malware that encrypts files and folders preventing access to important files.
- But the ransomware is just one of the methods cybercriminals use to attack Customers' services and infrastructures.
- So, customers are asking to identify solutions to protect their data and infrastructure from cyber or ransomware attackers.

New approach and solution

- Create a "clean" site, preventing hackers from accessing existing backup data, leveraging on air gapping and immutability capabilities.
- Ensures that no one can edit or delete any files after they are uploaded to the "clean" site.
- Leverage on AI/ML capabilities to detect anomalous behaviors or sign of corruption due to ransomware attacks.

Client benefits

- Reduced effects of cyber-attacks.
- Preserves Data Integrity with custom data protection/retention policies.
- Reduces business downtime in case of Cyber Attack enabling business restart both on source or clean site.
- Provides an anomaly detection backup-based solution. Integrated with Email and other Collaboration system.

About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organizations build their digital core, optimize their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 801,000 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. Our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities.
