Accenture

ACIC Rome brings together Accenture's deep technical know-how and industry expertise to help companies deploy cloud to transform their journey to cloud. At a time when innovation is racing ahead, Accenture is broadening its collaboration with leading cloud solution vendors to have instant access

to the level of specialist services that can help meet our clients' specific business objectives. At ACIC Rome, **we bring together** not only the major technology vendors but **the best offerings** from emerging providers in step with market evolutions. Our clients benefit from the very latest real and tested solutions.

About Google Cloud

Google Cloud is widely recognized as a global leader in delivering a secure, open, intelligent and transformative enterprise cloud platform. Our technology is built on Google's private network and is the product of nearly 20 years of innovation in security, network architecture, collaboration, artificial intelligence and open-source software.

We offer a simply engineered set of tools and unparalleled technology across Google Cloud Platform and Google Workspace that help bring people, insights and ideas together. Customers across more than 150 countries trust Google Cloud to modernize their computing environment for today's digital world.

Google Cloud's portfolio of products, services and tools enable customers to modernize their operations for today's digital world.

Google Cloud touches every layer of the business and includes:

Google Cloud Platform

with offerings that span storage, infrastructure, networking, data, analytics and app development

Machine learning tools and APIs

Google Workspace's collaboration and productivity tools

Enterprise Maps APIs

Android phones, tablets and Chrome books for the enterprise

The Accenture Google Cloud Business Group

Migrate to Google Cloud Now —with confidence thanks to the Google Accenture Business Group.

Accenture helps you migrate—faster— to Google Cloud, giving you the capabilities to manage your multi-cloud environments.

Leverage Accenture intelligence and Google innovation to embrace the founding principles of tomorrow's solutions: borderless, adaptable,

and Human Centric. The technology you choose today will determine the fate of your business tomorrow. Migrating to Google Cloud with Accenture gives you the flexibility and resilience to help remain competitive today, while Google Cloud's open platform and multi-cloud offerings give companies the ability to integrate seamlessly into their current strategies and evolve their digital transformation as needs change.

Google Cloud sets the foundation for modernizing your applications to unlock the full potential of data analytics and unleash innovation throughout your enterprise.

With Accenture's proven data-driven implementation approach and deep industry and cloud expertise, you can be confident that you have the right partner to guide your cloud journey into the future.

Accenture expertise combined with Google Cloud capabilities ensure you've got a flexible, adaptable cloud strategy—tailored to your needs, your workloads, and your multiple clouds—so you can act with confidence.

With speed

With Accenture's accelerators and capabilities alongside Google tools and automation, customers can migrate up to 10x faster than other platforms.

With security

Built-in encryption—along with strong regulatory compliance for critical, complex workloads—makes Google Cloud global enterprise ready.

Sustainably

Accenture's Sustainability practice, combined with Google, has the expertise to enable sustainable cloud migrations.

Data evolution

With Accenture data expertise, migrating to Google Cloud can lower TCO by 30% or more while unlocking insights and innovation.

The Partnership with Google Cloud

Google Cloud has partnered with ACIC to prototype solutions mainly focusing on one of its product: Anthos for Hybrid and Multi-Cloud Environments.

Application Modernization

Athos for Hybrid
and Multi-Cloud Environments

Context and client challenges

- A large number of companies need to centrally manage their IT infrastructure, with multi-cloud solutions allowing them to boost their digital transformation. This passes through a coherent platform for the development and modernization of applications, both legacy and cloud native ones, which offers a view of the services of all environments.

New approach and solution

- Through the Google Anthos platform we can support customers modernize and improve the scalability of their applications.
- With Anthos we can transform enterprises using VMs-based on-Prem environments or isolated Kubernetes cluster-based workloads, into new Multi-Cloud scenarios that allow for automatic provisioning of nodes and scaling. We can also leverage Google Cloud's offerings and tools to create a secure, scalable, and automated CI/CD pipeline for the on-premises and cloud development team.

Client benefits

- Run applications closer to end users and beyond the data centers in public cloud environments.
- Enable a modern CI/CD approach in cloud.
- Modernize existing applications and build cloud native applications anywhere.
- Monitor, troubleshoot, and improve application performance from a single pane of glass.
- Reduce cloud application deployment time from days to seconds.

About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organizations build their digital core, optimize their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 801,000 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. Our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities.
