Accenture Cloud Innovation Center

Pushing custom cloud solutions to the max.

Cloud delivers undeniable benefits – agility, rapid innovation and lower IT costs. The Accenture Cloud Innovation Center harnesses the full potential of Cloud to custom build latest generation solutions for our clients. We can give our clients access to a catalog of tested real cases to imagine, test and implement leading edge cloud services that can help take your business into tomorrow.

Now.

Accenture

ACIC Rome brings together Accenture's deep technical know-how and industry expertise to help companies deploy cloud to transform their journey to cloud. At a time when innovation is racing ahead, Accenture is broadening its collaboration with leading cloud solution vendors to have instant access

to the level of specialist services that can help meet our clients' specific business objectives. At ACIC Rome, **we bring together** not only the major technology vendors but **the best offerings** from emerging providers in step with market evolutions. Our clients benefit from the very latest real and tested solutions.

About Veeam

Veeam[®], is a global market leader in data protection and ransomware recovery, on a mission to empower every organization to not just bounce back from a data outage or loss but bounce forward.

With Veeam, organizations achieve radical resilience through data security, data recovery, and data freedom for their hybrid cloud.

The Veeam Data Platform delivers a single solution for cloud, virtual, physical, SaaS, and Kubernetes environments that gives IT and security leaders peace of mind that their apps and data are protected and always available.

Headquartered in Columbus, Ohio, with offices in more than 30 countries, Veeam protects over 450,000 customers worldwide, including 73% of the Global 2000, who trust Veeam to keep their businesses running.

Radical resilience starts with Veeam.

The Partnership with Veeam

Veeam has partnered with ACIC to prototype solutions mainly focusing on three of its products: Veeam Kasten K10 for Kubernetes, Veeam Backup for Microsoft Office 365 (VBO), Veeam Availability Orchestrator (VAO).

Application Modernization

Support applications migration
in K8S heterogenous
environments

Context and client challenges

- The adoption of modern cloud-native applications, particularly based on Kubernetes, is rapidly accelerating
- Both on Cloud and On Premise, Customers have different opportunities to leverage on the advantages of this technology
- Despite K8S numerous advantages, protect or move application to the cloud/On Prem is not easy as expected.

New approach and solution

- Leveraging on Veeam K10 we can:
 - Setup a centralized data protection environment to protect Central and branch offices
 - Enable Customers to perform application migration between heterogenous container platforms (Onprem to Cloud and viceversa)
- Simplify the Openshift cluster management enabling easy applications migration between Openshift environments.

Client benefits

- Enable Kubernetes based applications data protection via a Kubernetes native backup solution
- Enable Customers to move entire applications between clouds and on-premises for test/dev, load balancing, data management, upgrades or DR
- Use automated policies to manage how backups are securely replicated off-site and will meet business and regulatory requirements.

Infrastructure Engineering

Web app for multi-tenant O365
with Veeam backup for
Microsoft O365.

Context and client challenges

- Microsoft Office 365 offers several and powerful services to the customers, but a comprehensive backup of Office 365 data is not one of them.

Microsoft itself recommends to their customers to leverage on third parties solutions for data protection and retention aiming the data loss reduction.

New approach and solution

- Accenture and Veeam, leveraging on Veeam Backup for O365, can address this challenge not only providing an alternative solution to protect Customers data, but also enabling Customers to manage this one through a centralized and customizable API-based web portal.

Client benefits

- Eliminates the risk of losing access and control over your Office 365 data including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams.
- Service available through a customizable, multi-user Web Portal
- Enable “Backup-as-a-Service” capabilities.

Infrastructure Engineering

DR plan management with
Veeam Availability
Orchestrator.

Context and client challenges

- In the event of a disaster, companies need to recover their systems in a short time, reducing manual steps to a minimum and simplifying approval processes (before confirming target readiness).

New approach and solution

- Thanks to the use of Veeam technology, it has been possible to define and organize the typical DR management processes through a centralized and digital solution. Here, we can define a sequential flow of actions and approvals integrating automations able to reduce the human activities and recovery time accordingly, allowing to manage a DR Plan without specific skills.

Client benefits

- DR plan managed in a digital way.
- Automation integrated in the DR Plan.
- DR Plan manageable even without specific skills.
- Simplify the DR plan updates avoiding dedicated IT Documents.
