MILAN INDUSTRY X INNOVATION CENTER

FOR ENGINEERING

| 01

WHAT IS IT?

A way to change our future

As part of a group of Industry X centers around the world which focus on the execution of capital-intensive projects, the new Milan Industry X Innovation Center will operate as a big system player in the production chain, with the aim of bringing to the market **a unique mix of digital and sector-born experiences.**

A new setup, capable of accelerating the adoption of cutting-edge technologies while achieving greater control over **safety, sustainability, collaboration, time and costs.**

An advanced system set to transform all plants into sustainable realities.

WHY DOES IT WORK?

The key differentiators

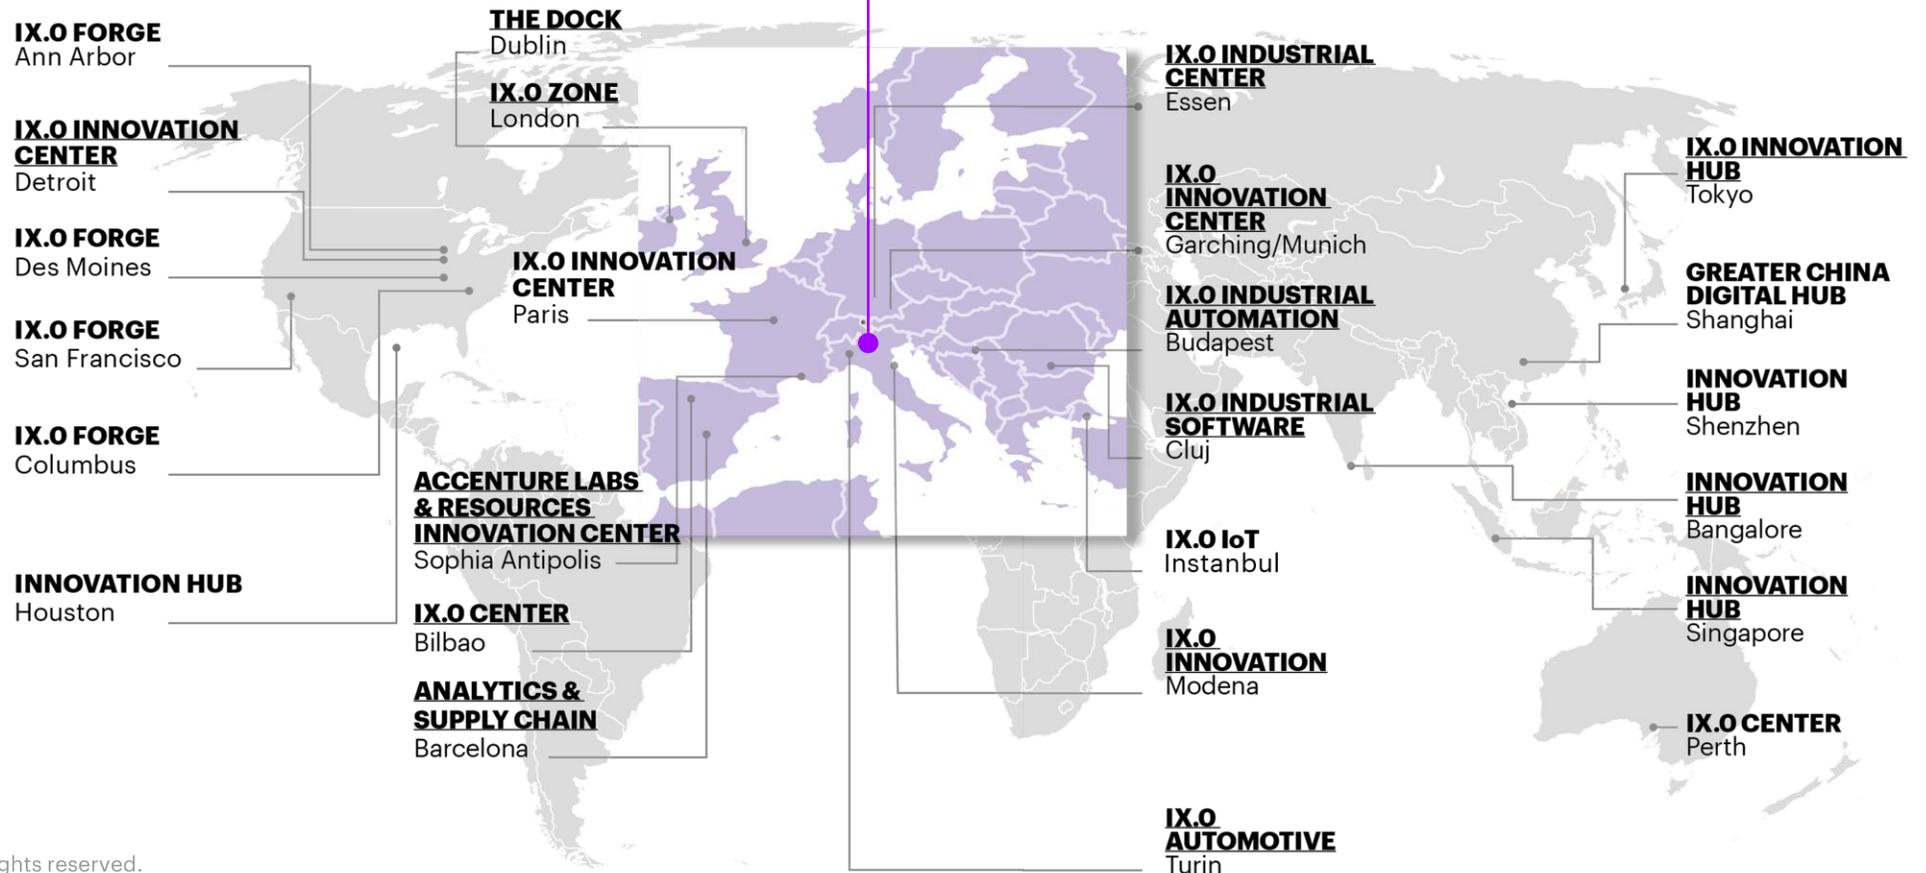

MILAN INDUSTRY X INNOVATION CENTER

FOR ENGINEERING

WHERE IS IT LOCATED ?

In the heart of it all

MILAN - Italy's most forward-looking city in terms of the Engineering, Procurement & Construction talents it hosts, and its industry-specific know-how, technical skills and world-renowned creativity.

WHO IS INVOLVED?

Meet the ones who play a part

MILAN INDUSTRY X INNOVATION CENTER

FOR ENGINEERING

| 01

HOW DOES IT HAPPEN?

A strong focus on core Capabilities

The Milan Industry X Innovation Center is a **COLLABORATIVE ENVIRONMENT** where EPC Contractors, Clients and Suppliers can experience a **combination of agile delivery approaches and advanced technologies** such as: AI, automation and blockchain, and 3D modeling tools integrated within Engineering Data Management platforms. A system capable of **generating and prototyping new ideas and digital solutions to be scaled up to create tangible value for the Clients.**

INNOVATION LABORATORY

Dedicated to the **concept and development of scalable solutions, it optimizes production processes** through the use of new technologies in coordination with the global network of Accenture Innovation Centers.

SPECIALIZED SERVICES

Built to support clients in activities that are core-related to the projects (e.g. project management, document control, expediting), **with the aim of increasing production capacity, absorbing workload peaks and optimizing outcomes.**

JOINT GO-TO-MARKET

Set up to support EPC contractors with intelligent, project-specific solutions capable of **augmenting the value proposition** for final clients while producing winning bids in the competitive context.

Center

SHOWCASES & DEMOS OVERVIEW

02

CLIENT BENEFITS

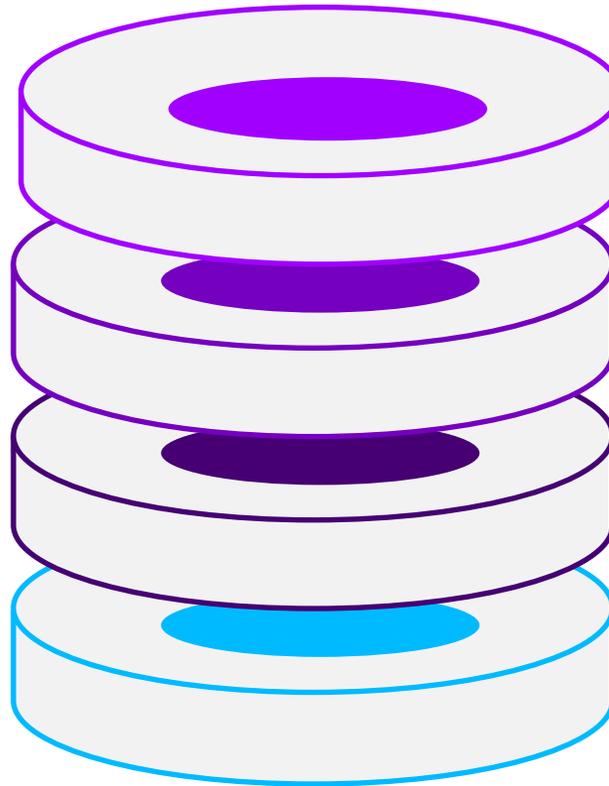

- Improvement of workforce productivity during normal operations (and during turnarounds)
- Accurate and efficient work progress tracking

Productivity

Smart Learning

- Empowerment of workforce through contextual, real-time support
- Collaboration with experts
- Simulated training

- Zero fatalities
- Quick and speedy response during incidents
- Safe and healthy work environment

Safety

Contractor Management

- Single source of truth
- Workforce compliance and records
- Management of skill profiles and demand
- Management of mobile equipment safety and demand

Main targets:

- Determine all facility, material and equipment **requirements**
- Produce all the required **technical deliverables**
- Review vendor **proposals**
- Ensure safety in **design**

Main targets:

- Source **material and equipment** from certified manufacturers
- Manage **logistics** for material & equipment delivering directly on site
- Expedite delivery to ensure the project is completed on **schedule**

Main targets:

- Provide a range of services from overall **construction management** to **actual construction** and **commissioning services**
- Complete the plant on **time**, on **budget** and following all **specification**
