

# KRISHNA VANKAYALAPATI AND WEI EASON (NCR)

## VIDEO TRANSCRIPT

**Krishna Vankayalapati** [00:00:00] Hello Wei, welcome to Accenture's Datasphere Lounge at Oracle CloudWorld. How's CloudWorld going for you?

**Wei Eason** [00:00:07] Great so far it's electric and people are really excited to see each other after a couple of years. And so we're learning a lot of new things, really enjoying it.

**Krishna Vankayalapati** [00:00:16] Coming to our next question, right. I have a quick question for you. How did NCR decide to move with the Oracle Cloud and what is your transformation journey?

**Wei Eason** [00:00:25] It's part of our NCR IT corporate strategy. We need to migrate our business applications to the cloud platform. We'll be running on EBS for probably 20 years now. It's really difficult to upgrade with all the customizations, so to stay current, we decided to go with the Oracle Cloud because it's very much in line with what we already have on our EBS site. So the data sets is very seamless.

**Krishna Vankayalapati** [00:00:50] That's good to know. And how has your experience been working with Accenture?

**Wei Eason** [00:00:55] I'm very impressed with the work ethic and the hard working group of people we're working with some on the Accenture team. I remember there's a couple of critical issues and pylons and during testing and also during a go-live and team working around the clock - both offshore team and onshore, so very impressed with the teams to make sure whatever it takes to make sure we resolve the client issue.

**Krishna Vankayalapati** [00:01:18] Thanks, Wei, and nice to have you here at the Datasphere Lounge. Hope you have a good rest of the day.

**Wei Eason** [00:01:23] Thank you for the opportunity.

**Krishna Vankayalapati** [00:01:24] Thank you.
