

WORKPLACE DIVERSITY AND ACCESSIBILITY - ACCENTURE

VIDEO TRANSCRIPT

This video features images of three Accenture employees interacting with accessible technology and tools in their obs.

Accessibility at Accenture

Hi, I'm Beatriz. Beatriz is a Tester and Developer at the CIO Accessibility Team in Spain. She is deaf. My name is Sergio Faria. Sergio is a Program and Project Management Associate Manager in Brazil. He is blind. Hi, I'm Jonathan Bray.

Jonathan is an Extended Reality Lead Developer in Ireland. He has autism. In my shoes So to me, innovation for accessibility is all about looking at the cool new technologies that currently exist and putting them to good use to make our world a more accessible place. I use to operate my computer the screen reader NVDA and I use additionally

one application on the my cell phone the name is Seeing AI. How can I communicate with my colleagues in Spain and around the world? I use the Microsoft Team app and read the subtitles in meetings but only in English. I also use Microsoft Translator app so that my colleagues talk with the microphone becomes text and I can read them. I have two high power digital hearing aids.

When I think about accessibility in my workplace the more important thing for me is the behavior of the people in my department because they really worry about my participation in all of the activities.

To me inclusion is where I can feel like an equal member of the team and also not be afraid to be myself. Nothing for us, without us. Disability inclusion matters.
