

METaverse CONTINUUM CONFERENCE HIGHLIGHTS

VIDEO TRANSCRIPT

This year our leaders, our special guests, our speakers, our partners, our customers, our people, have met in the best technology conference on the planet.

Have met in the Web Summit.

Have met in the Metaverse Continuum Conference.

Paddy, how do you see this Web Summit 2022?

I think there is a massive mind shift from several years ago.

Frankly to be able to do that it is not possible without technology and innovation.

We are investing in the technology of today and we are also investing in the technology of the future.

Connection between the physical and digital world. That is the metaverse.

In metaverse, we don't know how it will be.

I think it will affect our business in many ways.

There are three major things that will change the world. Education is one of them.

This will allow people to make change.

There is massive investment in creating more compelling virtual worlds.

Web Summit is pretty much everything about Accenture DNA. We combine innovation and technology.

Metaverse is reshaping businesses. The journey to the new era of digital change has begun.
