

Accenture Finance & Risk Services

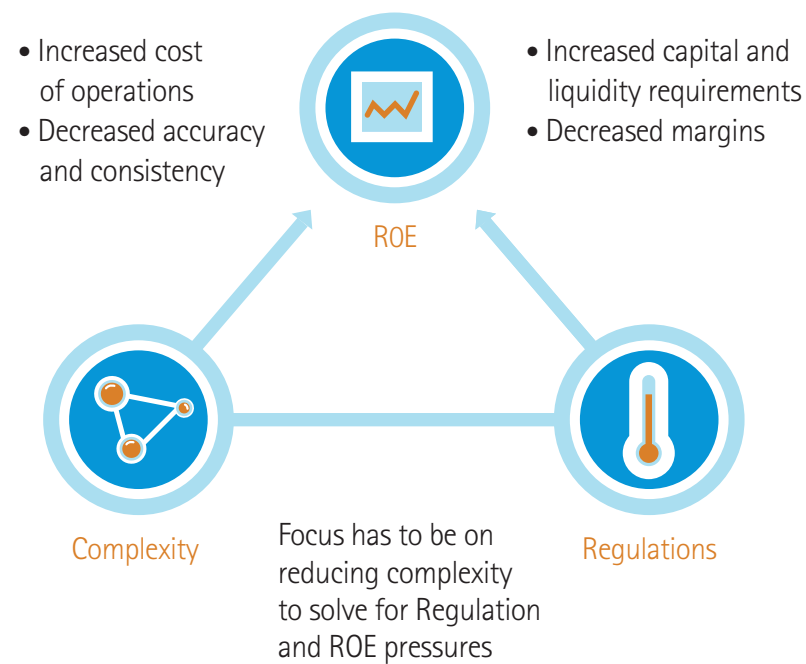

What's the burning platform?

CFOs and CROs in the financial services industry are facing a unique set of circumstances:

- Volatility in the economy and in financial markets
- Increasing regulatory demands
- Intensifying pressures on business profitability.

To remain competitive, firms must re-evaluate their business strategies and re-define their business and operating models.

ROE Optimization Triangle

What do we do?

We bring together Accenture's...

Our focus: To develop solutions which can help our clients restore profitability and also improve their competitive position for the marketplace of the future.

We help banks, insurers and capital markets organizations streamline their operating models, integrate risk and finance functions, align and integrate disparate sources of data, and deliver the technology solutions required to enable insight through analytics.
