High performance. Delivered.

Accenture Hybrid Cloud Solution for Microsoft Azure

Video Transcript

Satya Nadella
CEO, Accenture

Enterprise organizations around the globe are looking for the right platforms and partners to help them adapt and thrive in a mobile-first, cloud-first world. Hybrid cloud is the ideal way for companies to capitalize on the economics, agility and innovation opportunities of the cloud, while harnessing their existing IT capabilities. Together, Accenture, Avanade and Microsoft are delivering the Accenture *Hybrid Cloud Solution for Microsoft Azure*, which brings together the technology and expertise of our three companies.

I believe the result of this joint effort will dramatically accelerate enterprise cloud adoption, meaning more customers will reap the benefits of cloud, such as powerful new applications and services, new abilities to capture and use their data, and new ways to boost the productivity of the workforce. Key to this platform is the power to deploy, move and manage applications between consistent private and public clouds ... in a seamless and automated way.

This solution incorporates three complementary strengths: The enterprise performance, hyper-scale and hybrid capabilities of Microsoft Azure, as well as Windows Server Hyper-V. Avanade's deep expertise and innovation implementing Microsoft technologies. Accenture's specialized industry knowledge and pedigree of business and IT transformation. I'm energized by this joint initiative with Accenture and Avanade and how it will help enterprises transform themselves to digital businesses. Thank you.
