Accenture Operations for  
the Energy industry

We helped an upstream oil & gas production company achieve its goals of reducing costs and further leveraging high-quality resources through transitioning its finance processes to the Accenture Delivery center

We helped a global energy company transform their accounting operations and reduce their escalating costs by 50 percent

We helped a leading oil & gas company design an inventory management system for spare parts to improve its reporting and forecasting, while also aiding in identifying savings opportunities

Thanks to our Operations team bringing extensive, specialized experience to our Energy industry clients

A pioneer in Outsourcing, with more than 21 years of experience, we help energy clients navigate through the dynamic business environment, by using a wide and differentiated range of services and solutions that span the entire energy industry value chain.

Accenture Operations helps clients achieve high performance.

Our Next-Generation Operations focus combines analytics, domain expertise, technology and industry knowledge to drive innovation for Energy clients

We have globally connected people actively collaborating on 'Industry Communities of Practice'

Our Business Advisors have extensive industry experience and use it to uncover insights from clients' data to make recommendations that drive tangible business results-These initiative help Energy clients address business challenges like:

- Revenue generation
- Working capital improvements
- Enhanced competitive differentiation

With unmatched industry experience, analytical skills and global delivery capabilities...

We are helping our clients move from challenges to outcomes
