Digital ecosystems blur healthcare's boundaries, in a seamless across the health ecosystem. From robots performing housekeeping to driving healthcare, platforms are enabling smart cities, connected machines, robust platforms can link the entire healthcare ecosystem. The Digital Health Technology Vision 2016 reveals five trends that prove winning in the digital age hinges on people. After the consumer outcry from its iCloud breach in 2014, Apple came to understand the importance of building trust with consumers, and react in real time. Uber is now using its ecosystem to push disruption into new sectors—such as medicine. The Digital Health Trends section of the Accenture Technology Vision 2016 reveals five trends that will shape the future of healthcare. The Digital Health Trends section of the Accenture Technology Vision 2016 reveals five trends that will shape the future of healthcare. The Top 5 Digital Health Trends are:

1. The Liquid Workforce: As healthcare data security exposure will only continue to increase, so do opportunities to accelerate innovative internal business ideas that lead to new health and care delivery models.

2. Platform Economy: Platforms enable companies to capture what is happening with consumers, and react in real time. For example, SilverCloud provides an online solution for the treatment of mental and behavioral health disorders, allowing patients to engage in and take charge of their own care and provides clinicians with robust data that can make healthcare experiences more connected. Platforms can link the entire healthcare ecosystem.

3. Digital Ethics + Cyber Security: Industry-wide exposure of breaches will increase, so will consumer mistrust. Industry-wide exposure of breaches will increase, so will consumer mistrust. Platforms can link the entire healthcare ecosystem.

4. Predictable Automation: New automation tools can help healthcare organizations fulfill the promise of virtual care, which provides greater accessibility and efficiency. Predictable automation can help healthcare organizations fulfill the promise of virtual care, which provides greater accessibility and efficiency.

5. Trusted Territory: Proving digital health solutions are privacy and security protected will be a major factor in winning consumer trust.
