High performance. Delivered.

Accenture Trading Platforms Introduction

Overview – Video Transcript

In today's rapidly changing regulatory landscape and increasing demand for new trading products, capital markets can struggle to find, develop and maintain an effective trading solution.

Firms replacing, upgrading or managing front, middle and back office trading systems are dealing with controlling costs and accessing deeply skilled resources.

With more than 20 years of experience, together with the acquisition of Formicary, Accenture Trading Platforms is a market leader in delivering high performance trading systems.

We create front to back office and OTC clearing solutions that are cost efficient and ready to help meet the challenges of today and tomorrow.

Our alliances with key vendors such as Murex, Calypso and Misys lies at the heart of our delivery excellence.

- The sole Murex global alliance partner
- Global Calypso implementation partner
- Misys global alliance partner

We have over a thousand practitioners based across a global network of delivery centers.

And a dedicated Centre of Excellence that provides training, research, testing and development facilities.

We also boast a track record of over 140 delivered projects to date.

Our innovative software tools help deliver highly effective platforms and are designed to reduce our clients' total cost of ownership.

Like our change and release management tools or our bespoke system performance monitoring tools for both Calypso and Murex.

And Accenture DMP Suite, our default management process accelerator for OTC clearing members.

Welcome to the next level of trading platforms integration.

A winning combination of industry insights, global resources and deep technical knowledge.
