Reboot your approach deal effectively with threats

Define cybersecurity success

Prioritize test and develop your capabilities

Make security everyone’s job

Lead from the top

Keep innovating

Invest to innovate and outmaneuver

Build confidence in the security organization

Organizations widely believe in their ability to protect the enterprise. Yet, 1 in 4 focused breach attempts succeed. To protect the enterprise, understand 
...and rely too much on compliance. Do not hallucinate.

...and outmaneuver adversaries vs. investing in existing programs that enable outmaneuvering. 

Innovating and keeping a competitive advantage is key to dealing with third-party cybersecurity.

Invest in state-of-the-art solutions in strategy, consulting, digital, technology and operations. 

Every business is connected to the extended ecosystem. 

The top 3 areas essential for having a robust cybersecurity capability include communications, tested plans and strong cyber incident response. 

Prioritize protection of the organization’s key assets.

Focus on cybersecurity from strategy development. 

Understand scenarios that could materially affect the business, identify key drivers, and assess potential impact.

Understand the threat landscape, cyberattack scenarios.

Engage “white-hat” professionals and other relevant stakeholders. With approximately 384,000 people serving clients in more than 120 countries, Accenture helps companies improve their performance and create sustainable value for their stakeholders. With approximately 384,000 people serving clients in more than 120 countries, Accenture helps companies improve their performance and create sustainable value for their stakeholders.

Accenture is a leading global professional services company that helps clients transform and grow for the benefit of society and their stakeholders.
