Women in Technology

Video Transcript

Laura Miller, Senior Vice President, Global Solutions Delivery, InterContinental Hotel Groups

What skills have you developed in order to be the success that you are?

Well, I think if you’re going to be in a technology field the first thing you have to have is good technology IQ. And that came from experience and education and staying current in the technology. Um, once you move into a leadership role thought the IQ is, is important but then you need to develop the EQ. And probably the last, even two, three years of my career I’ve really honed in on the EQ aspects so I can be a better leader. How do I bring out the best in people, how do I, um, inspire people to, um, be the best that they can be. And how do I lead an organization toward a vision so that we can create something special.
