

# ANNOUNCING ACCENTURE SCIENTIFIC INFORMATICS SERVICES

## VIDEO TRANSCRIPT

### AT THE INTERSECTION OF SCIENTIFIC INNOVATION AND LEADING EDGE TECHNOLOGY

**BRAD MICHEL**

With the addition of LabAnswer to our team, we are announcing the launch of Accenture Scientific Informatics Services.

**MARK EVERDING**

Accenture's scientific informatics services is really the intersection of science—deep science—and technological know-how as well as technology and innovation.

**MICHEL**

... helping to bring new and transformative and scalable solutions to our customers that help improve the speed and efficiency of their scientific and laboratory processes.

**EVERDING**

LabAnswer is 250 people who wake up every morning thinking about laboratory informatics and data management—scientific data management.

**MICHEL**

Accenture Scientific Informatics Services will help our clients streamline processes across the R&D spectrum and through research, it will enable scientific researchers with new tools and technologies that help them do their job.

**MICHEL**

Quantum computing, cloud, automation, artificial intelligence, and analytics are all highly relevant to this space.

**EVERDING**

Our clients are going to really benefit from this because of the end to end solution that we're going to be able to offer--all the way from strategic planning and business objectives into implementation, technology roadmaps, and support.

**EVERDING**

By taking the scale of Accenture and the know-how of Accenture with our deep science, we're going to change the way research is done, and when we change the way research is done, we're going to change the world.
