Building Resilient Healthcare Systems

iDefense® Overview

Kevin Richards

Accenture Security iDefense® IntelGraph

Combating today's ever-evolving cyber threats requires relevant, actionable cyber intelligence. And being able to identify relationships among threat elements creates the context essential to making better decisions.

With nearly two decades of cyber threat intelligence, collection, analysis and delivery that has helped keep the .COM and .NET infrastructure secure and 100% available. iDefense® security and intelligence services fuse expert human intelligence with next-generation machine intelligence to help customers anticipate, prevent and mitigate attacks.

iDefense® leverages more than 100 global security researchers, including over 40 full-time threat intelligence analysts with proficiency in more than 20 languages.

iDefense® helps customers move from a reactive to a proactive security posture, enabling more efficient allocation of scarce resources.

At the core of this operation is the iDefense® IntelGraph, a proprietary, next-generation security intelligence platform. This platform allows users to make smarter and faster security decisions in context by visualizing the relationships between malicious actors, their tools and the vulnerabilities they exploit.

Providing customized content delivery and alerting, and offering RESTful API access for seamless integration into existing security technologies.

With iDefense® you will: increase the effectiveness of internal security teams, improve risk management operations, and save time and money.

No one can protect you like we can.
