Enterprises today create and store unprecedented quantities of data in their core systems, but too few are harnessing the power of that intelligence to drive better business outcomes. Through our end-to-end approach, we embed analytics into the fabric of our clients’ business to unlock trapped value at unprecedented speed and scale. Powered by new data, new science and new technology, we work with clients to drive digital transformation at the core of their business, delivering cost efficiencies and revenue growth, now. We call this Applied Intelligence.

**ACCELERATING SPEED-TO-VALUE: ENTERPRISE ANALYTICS AGILITY SOLUTIONS**

Combining the intelligence of big data and IoT with new innovations in advanced analytics, AI and machine learning, we’ve created proven predictive models that help manage and run the world’s most successful businesses. As a result, our clients can quickly capitalize on new opportunities in five key categories:

1. Finance & Accounting
2. Risk Management
3. Supply Chain Management
4. Human Capital Management
5. Sales and Customer Service

We offer 500+ analytics assets and 60+ proven apps to help clients advance their analytics journey to become data-natives at their core. From simple, turnkey applications to solve common business problems to more complex solutions, we offer a range of powerful predictive analytics tools that can integrate seamlessly with SAP® enterprise systems to drive greater agility across the value chain, accelerate time to market and identify new sources of value on an ongoing basis.
A few examples of our applications and possible outcomes:

**ADVANCED INVENTORY OPTIMIZER**
- Helps reduce inventory levels by 10-30%
- Improves fill rate service levels by 5-15%

**WARRANTY ANALYTICS OPTIMIZER**
- Improves end-to-end product quality and cuts spend per unit between 10-20%

**PAYABLES OPTIMIZER**
- Improves working capital position by 10-15%
- Improves discount capture by 10-20%
- Reduces duplicate payments by 15-20%

**INTELLIGENT COLLECTIONS OPTIMIZER**
- Improves working capital position by 15-20%
- Reduces disputes by 15-20% by predicting dispute patterns

**TALENT SUCCESS PROFILER**
- Provides insights to improve new hire productivity by 25-40%
- Improves recruiter productivity by 20-40%

**ATTRITION PREDICTOR**
- Predicts employees at risk of attrition and the reasons why
- Informs and tracks retention strategy and improves employee retention by 25-35%

**ACCENTURE ANALYTICS AND SAP: A PARTNERSHIP TO POWER BETTER BUSINESS OUTCOMES**

Accenture Analytics and SAP work together to enhance our clients’ SAP systems and solutions, making them work harder to drive growth and ROI. How? We have 16,000+ SAP analytics professionals across Accenture’s global network, helping clients integrate our enterprise analytics applications into existing processes and SAP software, including SAP S/4HANA® and SAP predictive analytics.

**LET’S TALK:**
**APPLIED INTELLIGENCE WITH ENTERPRISE ANALYTICS AGILITY**
