

GIRL SCOUTS

VIDEO TRANSCRIPT

The most fun thing about using the Digital Cookie® is learning how to make my own website, and in the future, I can make my own business.

I like that I get to sell to friends and family.

I was able to personalize my Cookie website by uploading pictures and videos, and also sharing my story.

I feel that you always have to put your own touch of glitter or your own touch of yourself and personality into something.

It also allows me to learn skills that I'm going to use in my career, and it allows me to have some fun too.

When I get older, I would love to go into government and politics.

I want to be an anesthesiologist because I like helping people, and I am great at math.

There are not a lot of women in STEM. So, I think we need more of that. So I want to bring that up and be either a robotic cardiologist or a robotic OB-GYN.

I would like to be a chemist who makes beauty products, hair products, lotion, lip gloss.

I love the idea of helping others and being able to have an impact on the world.

This is our new generation. Technology is everywhere and we have to get used to using it, and it makes your life more convenient I would have to say if you use it the right way.
