

Accenture Industry X.0 Video Transcript - Gabriela

Narator Use your digital skills to Be Greater Than. Be yourself, make a difference by joining us.

Speaker My name is Gabriela and I've been working for Accenture for six years. My position is a .Net developer and at the same time, I'm also a Team Lead. I work in the field of railway automation, where we develop software solutions for optimizing and streamlining railway traffic. My biggest passion is sports and I'm fortunate that Accenture supports this hobby of mine. It gives me the opportunity to go to the gym, spend as much time as I need, and come into the office afterwards. At Accenture, anyone can find their place. What I like most about my job is its diversity. We work with various technologies, which we are able to perfect, and we have a diversified career path.
