# **ACCENTURE CONFIGURATION TOOL FOR CALYPSO**

# The Accenture Configuration Tool for Calypso is one of the most comprehensive and sophisticated end-to-end change and release management tools available for Calypso. A vital aid for any Calypso development project, the Accenture Configuration Tool for Calypso makes configuring Calypso, simple and straightforward, from start to finish.

Achieve total visibility over Calypso configuration, avoiding duplication of work

High quality delivery every time

Quality control and manual merge errors

Search and track promotion of configuration across environments

**Accenture is a global implementation partner of Calypso**

Accenture has worked with Calypso Technology as an official partner for over a decade. Our in-depth knowledge of implementing, upgrading and integrating the Calypso Trading and Risk Management platform allows us to provide exclusive access to training materials, in addition to being licensed to carry out client demonstrations, prototyping and development.

This unique partnership also enables us to significantly extend the development of solution accelerators and market Accenture-owned tools bespoke to Calypso, including CalMon, the system performance monitoring tool, and the Accenture Configuration Tool for Calypso. Our Center of Excellence provides the latest reference environment, including documentation and testing scenarios, and all our consultants are trained through the Calypso University training program.

# TIME IS MONEY: THE TOOL HELPS ACHIEVE HIGHER QUALITY DELIVERY AND REDUCE DEVELOPMENT TIME AND COSTS.

The rapid pace of change in financial markets, capital allocation pressures and an ever-changing regulatory landscape demands reliable, adaptable technology to keep up. As the leading global provider of multi-asset trading solutions, Calypso provides customers with a powerful and fully customizable platform which enables faster time to new markets, risk reduction and lower development costs.

In order to get the most out of the platform and maximize efficiency when configuring Calypso, it is important that you have a robust configuration process in place. Keeping track of changes—who did what, when, and why—is vital to ensure that nothing gets accidentally overwritten. This is challenging when there are multiple environments and workstreams.

Doing this on a manual basis can prove cost and resource prohibitive. With multiple developers working at once, coordination can naturally become very difficult, increasing the risk of manual mistakes.

The Accenture Configuration Tool for Calypso helps to solve all of this. It is a powerful, comprehensive and sophisticated end-to-end configuration management tool available for the platform. It provides completely automated version control, allowing users to easily compare environments to quickly spot specific changes and fixes, to track the progress of a change and to search across environments to see which configuration is in which environment.

The result is total visibility and the creation of full audit trails across the entire development and release cycle, from start to finish. The Accenture Configuration Tool for Calypso makes configuring Calypso as easy, efficient and straightforward as possible for all team members involved, from project and deployment managers through to developers and testers.

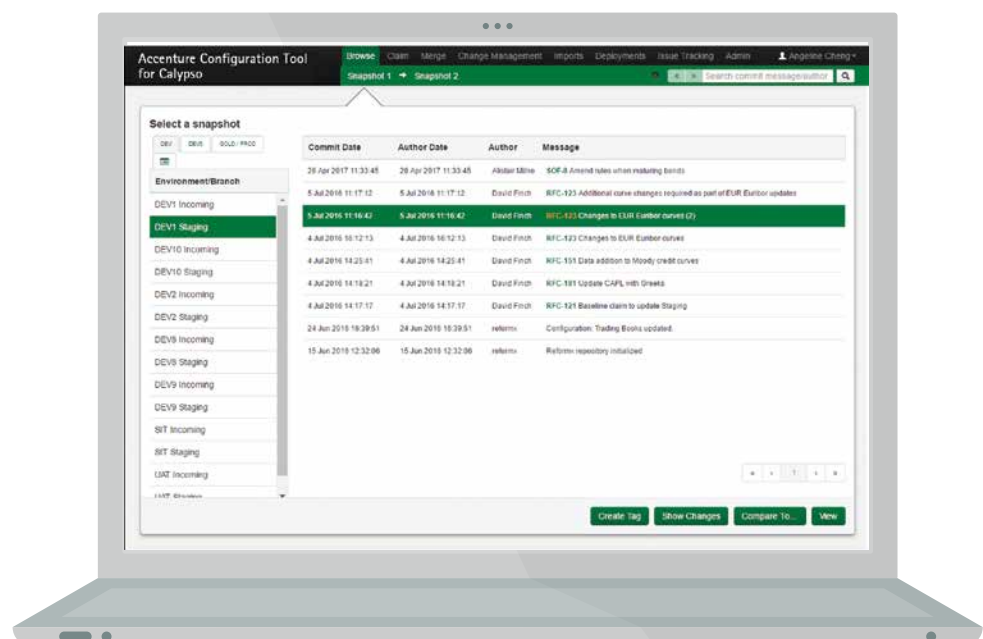

## The Benefits

- Significant time and cost savings
- Reduces the risk of manual errors and delays due to lack of team coordination
- Vital for implementing continuous integration and delivery

**The Accenture Configuration Tool for Calypso provides a number of unique features to support each key stage of the configuration process, allowing all involved to work together more efficiently and cohesively:**

## **DEVELOPMENT PHASE – MAKING CHANGES**

- All configurations are automatically tracked and logged with detailed information on a line-by-line, developer-by-developer basis, showing who made the change, when and why, creating a full audit trail and version history. This audit data becomes part of the release package and works across multiple environments.
- The Accenture Configuration Tool for Calypso makes it easy to compare an environment to past dates and other environments side-by-side, with specific changes and fixes highly visible
- Can be easily searched and browsed by time, type and developer
- Changes can be easily removed and reverted

## PACKAGING CHANGES

- The tool packages only changes that should be released, and not all other underlying objects
- Changes, groups of changes and different versions can easily be merged
- Where there is conflict between configurations, this will be flagged up - no more accidental overrides or lost changes

## TESTING

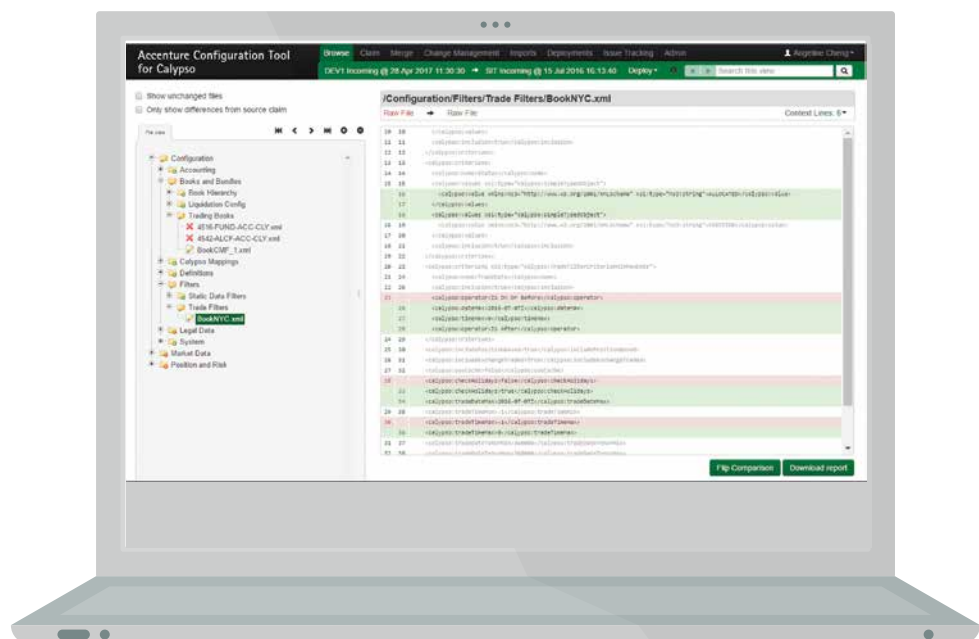

- Easy to search for fixes and see where they have been deployed
- A vital part of implementing continuous integration and delivery

## DEPLOYMENT/RELEASE

- The tool enables the grouping of changes for merging and release
- The tool deploys directly into Calypso, saving time

## ADDITIONAL FEATURES

- Fine-grained permissioning system built-in, allowing for total control over who can view and make changes
- Integrates with third-party tracking tools such as JIRA
- All features accessible easy-to-use web interface
