**OUR CALYPSO
CAPABILITIES**

ACCENTURE AND CALYPSO

Capital markets firms face a more a challenging environment today than perhaps at any time in the past. Across all business functions—front office, back office or treasury—complexity is on the rise, and risk exposure harder to manage. Having an effective, integrated trading architecture is more crucial to your success than ever before.

Over the past 10 years, Accenture has been working with clients to transform their front, middle and back office operations and risk management functions, including collateral management and treasury operations, using Calypso software. Accenture is a Calypso global implementation partner and we have developed many custom tools around the product to augment and enhance its capabilities to suit our clients' evolving needs.

Accenture provides consulting, system integration and outsourcing services around Calypso. We have a wealth of experience in Calypso projects of different scales, providing implementation, integration, upgrade, support and maintenance services.

We are very passionate about what we do and have a deep understanding of the many challenges that can arise when deploying and implementing a trading platform in multi-system and multi-vendor environments. Be it an absence of clear requirements, different expectations or a breakdown in communications—we know exactly how and where to get started in helping to deliver clear solutions that meet our clients' needs.

Our comprehensive range of services and accelerator tools is designed to transform our clients' front, middle and back office operations, including risk, collateral management and treasury operations.

ACCENTURE

GLOBAL IMPLEMENTATION PARTNER

Accenture has been an official partner of Calypso since 2006. This gives Accenture early access and unique insight into the platform, exclusive access to training materials and licenses for Accenture to carry out client demonstrations, prototyping and development.

CALYPSO ACCELERATORS AND TOOLS

The partnership enables Accenture to significantly extend the development of solution accelerators, and to market Accenture-owned tools for Calypso, including CalMon, a system performance monitoring tool.

OVER 200 CALYPSO EXPERTS ACROSS THE GLOBE

We have a team of over 200 Calypso professionals across the world helping clients implement, integrate, upgrade, support and maintain their trading systems on an onshore, nearshore and offshore basis.

BRINGING TOGETHER LEADING SOLUTIONS AND INDUSTRY KNOWLEDGE

Our alliance brings together Calypso's leading front-to-back technology solutions for financial markets with Accenture's unparalleled industry knowledge, integration capabilities and service offerings. This includes front and back office integration across a wide range of asset classes (e.g. bonds, equities, FX derivatives, credit derivatives and structured products), functional areas (e.g. operating models, process design, parameterization, data migration, testing and technical architecture) and across all continents.

CALYPSO CENTER OF EXCELLENCE

Our Center of Excellence has the latest reference environment, including documentation and testing scenarios, and our Calypso consultants are trained through the Calypso University training program.

BRINGING CALYPSO TO YOU

Our long experience of working on numerous Calypso implementation projects has allowed us to develop a unique and robust set of services, tools and offerings around the platform. In addition, we have the skills and expertise to support our clients with back office integration across a wide range of asset classes, including FX, bonds, equities, derivatives and structured products.

OUR CALYPSO SERVICES

Consulting

- Strategic assessments
- Process consulting
- Target operating model
- Trading architecture design
