ACCENTURE LIQUID STUDIO DELIVERING INNOVATION WITH SPEED AND AGILITY
Liquid Studio Manila is an open, collaborative space designed for co-innovation and rapid application development. We help clients address tomorrow’s business challenges today by combining industry skills and knowledge with exciting new methods, processes and technologies.

We are the first Liquid Studio co-located in an Accenture Delivery Center. Immediate access to a large and diverse talent pool with more than 30 years of industry experience enables us to ideate and innovate at accelerated speed and scale.

**THE LIQUID ADVANTAGE**

- **Demos and use cases powered by New IT**
- **Highly skilled studio residents**
- **2,000 sqm of studio space for co-creation, experimentation and innovation**
**FAST. AGILE. RELEVANT.**

Liquid Studio Manila unlocks the enormous potential of new and emerging technologies. We ideate, experiment and build solutions with clients to help them lead in today’s rapidly changing business landscape.

### HOW WE WORK

**SPEED**

Modern architectures, reusable components and rapid development techniques turn ideas into products in just a few weeks.

**CULTURE**

Clients and studio residents work side by side, applying new and emerging technologies to address business challenges.

**EXPERIMENTATION**

The Idea-Experiment-Build-Evaluate cycle produces better products, solutions and services.

**REUSABILITY**

Lightweight architectures, reusable services and standard APIs ensure operational excellence.

### WHAT WE DELIVER

**INNOVATION EXPERIENCE**

We conduct workshops and interactive sessions using Design Thinking principles to help clients and our teams apply technology to business needs. The result: truly impactful and relevant ideas and products.

**RAPID APPLICATION DEVELOPMENT**

We leverage agile methodology, DevOps and cloud to quickly turn ideas into working prototypes, proofs of concept or demos that our clients can see and experience.

**HIGH-TOUCH SOLUTION ENGINEERING**

We work closely with clients to get their feedback and quickly incorporate it into our solutions. We also leverage modern methods, architectures and delivery models to address business needs at speed.

**MOBILIZE TO SCALE**

Leveraging Accenture Delivery Center’s platforms, tools and experts, we reduce development time from months to days. We can rapidly kick-start a large-scale project or quickly turn a prototype into a fully operational and managed product.
TOMORROW’S SOLUTIONS, TODAY

IMMERSIVE COMPUTING
Get real-time, always-on engagement and experiences through augmented and virtual reality. By blurring the lines between the physical and digital worlds, immersive computing enables next-generation commerce capabilities that drive sales, loyalty and efficiencies at scale.

VIRTUAL ASSISTANTS
By combining robotics technology with natural language processing and artificial intelligence, today’s virtual assistants are able to engage with customers—delivering information quickly and effectively across multiple interaction channels.

ROBOTIC PROCESS AUTOMATION
Automate repetitive and time-consuming processes. By eliminating human error, robotic process automation improves quality of work, and also enables employees to focus on higher value tasks and responsibilities.

DESIGN THINKING
This collaborative, human-centric and iterative approach to problem-solving enables us to successfully leverage the creativity, diversity and imagination of our people to drive highly innovative solutions.

DEVOPS
Our delivery approach brings experts and stakeholders together in a highly collaborative group. This results in increased productivity, faster delivery of new functionality and reduced time to market.
ABOUT ACCENTURE

Accenture is a leading global professional services company, providing a broad range of services and solutions in strategy, consulting, digital, technology and operations. Combining unmatched experience and specialized skills across more than 40 industries and all business functions—underpinned by the world’s largest delivery network—Accenture works at the intersection of business and technology to help clients improve their performance and create sustainable value for their stakeholders.
