MANAGING THE FUTURE OF HEALTHCARE REQUIRES UNDERSTANDING ITS HISTORICAL CONTEXT.

The Internet of Health Things (IoHT) is already delivering tangible cost savings. But is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

The answer is that all of these concepts are now deliverable at scale. It is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

SO WHAT IS NEW?
The answer is that all of these concepts are now deliverable at scale. It is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

THE PAST SHAPES THE FUTURE

Managing Healthcare using the Internet of Health Things

Digital transformation has been challenging (and even terrifying) for the healthcare industry across digital waves.

The answer is that all of these concepts are now deliverable at scale. It is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

THE CONCEPT OF THE INTERNET OF HEALTH THINGS IS NOT NEW—MANY OF THE IDEAS BEHIND IT HAVE BEEN WITH US FOR MORE THAN TWO DECADES.

IoHT has evolved through the three waves of digital transformation to open up the possibilities of growth for tomorrow.

The answer is that all of these concepts are now deliverable at scale. It is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

THE EMERGENCY RESULTS FROM:

The episode of everything
Changing the way we think about and prepare for a changing healthcare industry across digital waves.

• Regulatory changes (for example, value-based care)

• The explosion of chronic disease)

IoHT has evolved through the three waves of digital transformation to open up the possibilities of growth for tomorrow.

The answer is that all of these concepts are now deliverable at scale. It is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

• The explosion of chronic disease)

IoHT has evolved through the three waves of digital transformation to open up the possibilities of growth for tomorrow.

The answer is that all of these concepts are now deliverable at scale. It is not only possible to create IoHT services, but it is becoming a business imperative for healthcare organizations.

NEW?

Are all being actively discussed as early as the late 1990s.

More are being actively discussed as early as the late 1990s.
