Percentage of seniors interested in different types of AI doc interactions

- **59%** Use AI doc to get information after hours or when an immediate doctor’s appointment is not available
- **54%** Use AI doc to help navigate healthcare services (e.g. finding a specialist, learning about funding options, making appointments)
- **41%** Use AI doc for emergency advice (e.g. how to treat a head injury, snake bite or broken leg)
- **37%** Give AI doc secure access to the full medical record so it can provide a more accurate assessment
