

# COOLEST JOB EVER MEET NADA

## VIDEO TRANSCRIPT

Hi, my name is Nada Abulibdeh. I am a part of Accenture Technology and I work out of Lansing, Michigan.

Good morning I am heading to work. I live close by so I drive there every day. I would say the challenges in my role include especially when I get a new task getting to know the task and the requirements and exactly what the client wants and needs in order to deliver to deliver the best service.

Our team comes from various backgrounds, we all work locally from the office. The people here are great. They are so much fun to be around. Hi Nick. Hey Nada.

Work life balance is very crucial to me. It means I get to spend more time with the family, I get to have more time to do my hobbies and unwind from the stress of work. I'm having dinner with my cousin. Hey Thala. Hello!

There are two key factors that made me decide to join Accenture. Number one was their commitment to create an inclusive and diverse culture within the company and that's something now I see every day.

The second key factor is how much they invest in their people in terms of education and training

As someone who loves to learn being somewhere where I can learn and grow personally and professionally and supported and provided with the resources that I need makes all the difference.
