## How to Make the ERP Move to Cloud Video Transcript

Speaker: Stephanie Arnette  
Accenture Managing Director, Oracle Cloud Offerings

This market is growing at a rapid rate. NetSuite, SAP and Oracle are all seeing growing demand. With products coming from both disrupters and legacy vendors, the journey to cloud-based ERP is an interesting one.

The maturity of these products over last year, and going into next year is going to skyrocket.

This momentum is peaking the interest of our clients and forcing them to ask themselves, "Should I go to the Cloud? And if I do go, when will I be ready, and how do I get started?"

Corporations are confident putting non mission-critical APPs on the cloud. For example, CRM and HR are paying huge dividends for CIOs.

But when it comes to ERP, which includes financials and supply chain, they get a lump in their throat.

The solution for many is to first move their existing estate to Infrastructure as a Service, gaining benefits while they watch this space mature.

We'll soon see which products catch fire, and which large enterprises will blaze the trail using them.
