DATA AND ANALYTICS DRIVE HIGH-PERFORMANCE DIGITAL INSURANCE BUSINESSES

TOP-PERFORMING INSURERS USE DATA FROM AN INCREASING VARIETY OF SOURCES TO UNCOVER INSIGHTS THAT DRIVE NEW REVENUE AND ADDED VALUE, WHILE DRIVING DOWN OPERATIONAL COSTS.

Research shows that insurers are prioritizing data and analytics across their businesses and distribution channels to gain a competitive advantage.

Until now, a big challenge has been the time and resources to get the data right and to configure analytics tools to work specifically for life and annuity businesses.

63% of insurers surveyed prioritize the use of customer data for needs-based selling.1

26% of insurers say they validate data sources to some extent but admit there is more they should do to ensure data quality; 19 percent admit they try to validate their main data sources but are not sure of the quality.2

AND IT’S READY OUT OF THE BOX!
Analytics is about knowing your business. So why use an analytics solution that wasn’t specifically built for your business? That’s the question we asked and why we designed the first analytics solution specifically for the life and annuity business. It combines Accenture’s extensive data science capabilities with its life and annuity industry expertise to bring you the specific insights you need to run your business more profitably and competitively.

Accenture Life & Annuity Analytics is a turn-key, as-a-service solution with prebuilt insights and dashboards from predictive and forecasting models based on use cases across specific life and annuity domains:

- New business and underwriting
- Operational performance
- Agent and customer behavior
- Product and marketing

Uncover growth opportunities and cost savings with a fast, easy and more relevant way to convert data into knowledge.

HERE’S HOW ACCENTURE LIFE & ANNUITY ANALYTICS WORKS
Accenture Life & Annuity Analytics extracts and transforms data from any source — the Accenture Life Insurance & Annuity Platform (ALIP), other internal systems or third parties — into ALIP’s denormalized data model. Then Accenture Life & Annuity Analytics’ prebuilt, insurance-specific dashboards produce advanced reporting in addition to predictive and forecasting models, including actionable insights.
THE POWER TO PREDICT, PERFECT, PERFORM!

With Accenture Life & Annuity Analytics, there’s no costly development time or resources. License only the dashboards that are relevant to your business.

1. OPERATIONAL PERFORMANCE
   Drive efficiency and profitability throughout the life of the policy. Use operational data to identify trends and to predict future service transactions that can help you plan staffing levels and customer experience actions such as conservation programs.

2. AGENT & CUSTOMER BEHAVIOR
   Use behavioral data to identify patterns and opportunities that help you anticipate customers' and agents' needs and nurture long-term profitable relationships with customers and agents.

3. NEW BUSINESS & UNDERWRITING
   Use your new business and underwriting operations data to improve processes and correct issues before they impact your profitability. You’ll gain a better understanding of your new business profitability and predict policy issue decisions.

4. PRODUCT & MARKET
   Boost revenue and profits by comparing your performance with market data to drive sales efforts and product development. The data can help you outperform your competitors by selecting the right markets and pairing the right products to the best opportunities.

5. RISK & FRAUD
   Protect your business from fraudulent activity and ensure regulatory compliance.

OUT-OF-THE-BOX DASHBOARDS AND PREDICTIVE MODELS

- Product Overview
- Policy
- Portfolio evolution
- Geo location analysis
- Surrender inventory and trend
- Withdrawals inventory and trend
- Death claim inventory aging and loss ratio
- Other key transactions inventory and trends
- Predict lapsation

- Customer financial performance
- Customer non-financial behavior
- Agent portfolio performance
- Predict surrender
- Forecast withdrawals
- Forecast death claims
- Forecast surrender timing

- NB/UW Volumes
- NB/UW Efficiency
- Requirements Analysis
- NB suspense aging
- Predict contract issuance

- Market potential
  ROI/profitability for existing products
  New product ROI/profitability projections

- Pattern detection based on historical service transactions
- Social network and media inputs

PREDICT SURRENDERS
Many Life and Annuity contract holders surrender because they don’t understand the benefits
Agent and Customer Behavior Surrender Prediction Results shows probability and timing of surrenders
WHAT CAN YOU DO?
Implement retention programs to the right policy holders at the right time

STREAMLINE NEW BUSINESS & UNDERWRITING
Consumers expect instant gratification and won’t accept traditionally long turn around times for policy issue
NBUW Requirements Analysis identifies vendors that may be taking longer than needed to order requirements
WHAT CAN YOU DO?
Improve ordering processes; negotiate better pricing and tougher SLAs; rationalize vendors

IDENTIFY MARKET OPPORTUNITY
Most carriers benchmark against themselves instead of combining their data with market data
Market Potential shows how well your sales are performing compared to market potential
WHAT CAN YOU DO?
Allocate resources and sales effort commensurate with the opportunity

INTEGRATION CENTER OF EXCELLENCE (COE)
Speed integration. Our integration CoE maintains all integrations, interfaces and APIs built for ALIP and ensures they’re tested and ready to use out of the box and in your environment. Integrations are made available to all clients within ALIP’s Interface Exchange. The CoE continues to advance its integration best practices and add capabilities including ALIP’s Integration Workbench that lets you build and test your own interfaces in real time and adapt quickly to the expanding insurance ecosystem.

BASE FIRST DEVELOPMENT
Benefit from ALIP’s product development program that directs all Accenture and relevant client configuration and enhancements back into the base platform—continually expanding the number of product templates and client-tested functionality and best practices.

CLIENT ADVISORY BOARD
Join this active community of client executives that help guide product development and serve common interests. You’ll have an opportunity to engage your industry peers and discuss trends, best practices and lessons learned, then transform your ideas into product enhancements.

CONTINUOUS UPGRADE
Remain current with predictability at a fraction of the cost of traditional “big bang” upgrades. Maintain your investment by ensuring access to our ever-growing library of product templates, configuration and overall enhancements.

TESTING CENTER OF EXCELLENCE (COE)
Improve quality and efficiency while reducing risk. Our testing CoE applies best practices and standardized tools to ensure that new features and enhancements are backward and forward compatible with the latest release of ALIP. The CoE continues to deliver standardized tools and capabilities, including ALIP’s Product Testing Workbench and Product Value Debugger along with industry-standard IBM Rational Suite® and Worksoft® automation tools, that enhance quality and speed to market.

ALIP UNIVERSITY TRAINING
Become self-sufficient with training through a variety of courses that address skill levels from novice to advanced. Each course is designed to help you gain greater value from your ALIP investment.

MIGRATION EXPERTISE
Get more value from your legacy data. ALIP’s dedicated migration team applies industry-leading practices and robust tool sets to migrate your data accurately. Along the migration path, they validate and verify data using automated encryption/decryption, summary balancing reports and more.

EXPERT DELIVERY EXPERIENCE AND INSURANCE EXPERTISE
Gain peace of mind knowing that ALIP’s delivery team has more than 2,000 combined years’ experience and a proven track record of on-time and on-budget project management. And with Accenture’s global scale and scope, your project will get efficient and effective round-the-clock delivery and testing.
