Enable mobility to improve the patient experience

Both providers and payers are faced with budget pressures, escalating costs, and a growing demand for more convenient, affordable, high-quality healthcare. To address these challenges, you need to leverage the latest technologies to digitize your business, enable mobility, and take advantage of new business models to support the delivery of better healthcare.

To enable the digital enterprise and meet the demands of mobile practitioners, EMRs, HIEs, advanced Internet of Things (IoT) in the form of wearable medical devices, and healthcare analytics, networks need to rapidly adapt and change to meet demand without losing momentum. As network traffic increases, IT needs to find new ways to increase capacity, simplify management, reduce costs, and deliver more value-added services.

That's why Accenture and HPE have joined forces to deliver network transformation solutions that optimize and simplify network operations with agile platforms to improve the patient experience.
Enable transformation

Accenture | HPE Adaptive Networking solutions meet the demands of your employees and partners with integrated wired and wireless technologies to help you transform to digital and focus on delivering consolidated service outcomes. Transform your legacy network—reducing complexity and cost—by addressing the provisioning, mobility, and complexity challenges of virtualized and cloud-based IT operations.

Increase service velocity with an intelligent, centrally controlled network

Meet the high-bandwidth and dynamic demands of today’s wearable medical devices and EMR and HIE applications with flexible and cost-effective NaaS. Accenture | HPE Adaptive Networking solutions offer BYOD users the access they need while ensuring compliance and cost-effectively securing your network at the edge, enabling seamless collaboration and enhancing the user experience.

Accenture | HPE Adaptive Networking solutions address your biggest network challenges with open, application-first networks with zero-threat protection at the edge. Optimized to meet real-time traffic needs, they program and dynamically deploy network elements on-demand. Visualization tools increase transparency for end-to-end orchestration, provisioning, monitoring, and policy-based network management.

Accelerate service innovation by increasing operational efficiencies

Accelerate the journey from legacy networks built on monolithic, proprietary appliances to your agile cloud network. Accenture | HPE Adaptive Networking solutions allow you to move to a virtualized network, instantly add capacity, and manage the entire network from a single, unified control application. The flexible, open-source architecture simplifies multivendor integration and optimizes expenditure with a hosted service model.

Optimize efficiency, flexibility, and scalability while reducing risk

The solutions come complete with Accenture Network Transformation Services that enable clients to improve performance and reduce risk with an end-to-end network strategy for optimized efficiency, flexibility, and scalability. Accenture uses established, industry-leading tools and methodologies, industry-specific templates, and advanced technologies to transform and run global healthcare networks.

Offering end-to-end network and vulnerability management, Accenture services provide measurable performance improvements, industry-leading service levels, sustained cost savings, and ongoing network agility.

Reduce CAPEX and maximize OPEX with consumption-based pricing

Accenture | HPE Adaptive Networking solutions offer consumption-based, pay-as-you-go pricing, preserving capital by helping shift infrastructure costs to operational expenses. The “pay-per-active-port” consumption model aligns IT spend with business priorities, closes the gap between IT demand and IT budget, and allows you to scale and adapt your network based on the unique demands of your organization.

Accenture and HPE—accelerating results

For over 25 years, Accenture and HPE have combined unparalleled industry experience and consulting capabilities with industry-leading technology and services to deliver innovative solutions that transform, enable, and protect your business.

Transform with Accenture | HPE Adaptive Networking solutions to increase scalability, simplify management, optimize expenditure, reduce risk, and deliver an improved patient experience.
