

Career Capital 2014 Global Research Results

High performance. Delivered.

International Women's
Day 2014

Research Objectives

- Accenture conducted its global research study, “Career Capital” for release on International Women’s Day to gain insight into behaviors and attitudes regarding women’s careers and what it takes to succeed in the workplace.
 - The research:
 - Seeks to better understand career capital – what are the contributing factors, how do professionals define and work to increase it.
 - Predicts workplace attributes and the role of women in leadership in the future.
 - Explores career satisfaction and the value of experience and education in the workplace.

Respondents' Profiles

Male

Female

Methodology

- Accenture fielded an online survey of 4,100 business executives from medium to large organizations across 32 countries.
 - Argentina, Australia, Austria, Belgium, Brazil, Canada, China, France, Germany, India, Indonesia, Ireland, Italy, Japan, Malaysia, Mexico, Netherlands, Philippines, Saudi Arabia, Singapore, South Africa, South Korea, Spain, Switzerland, Thailand, United Arab Emirates, United Kingdom, United States
 - A minimum of 100 respondents participated from each country, excluding Denmark, Finland, Norway and Sweden where the combined number totaled 200.
- The survey was conducted in November 2013; the margin of error is +/-2 percent.

Executive Summary

“Career capital” is key to success in the workplace

More than **89 percent** of female professionals around the globe and a **similar number** of male **respondents** believe **building their “career capital”** – those differentiated skills that define and advance their careers – **is key to success** in the workplace.

Working to increase career capital

Eighty-four percent of both women and men say they are working to increase their career capital.

Two out of three (**67 percent**) respondents believe knowledge or competency in a particular area contributes most to career capital.

For respondents, career capital means having opportunities for growth (**57 percent**), influencing decisions at work (**56 percent**), having credibility with peers (**53 percent**) and reaching goals (**51 percent**).

Change in the workplace

The vast majority of professionals surveyed (**91 percent**) agree that the most successful employees will be those who can adapt to the changing workplace.

89 percent report that they thrive on or don't mind change.

Three out of four (**75 percent**) agree they are equipped to succeed in the future.

Predictions – women in the workplace

Women on Boards

Nearly three-quarters (**71 percent**) of all respondents think the number of women on boards will increase by 2020.

Women at the Top

70 percent think the number of women CEOs will increase by 2020; a portion of these respondents (**15 percent**) believe the increase will be significant.

Women in Senior Management

Nearly half (**44 percent**) of respondents say their companies are preparing more women for senior management roles than in the past year.

Work-related topics – further insights

Raises and Promotions

More than half (**57 percent**) of all respondents have asked for or negotiated a pay raise, and three out of four (**77 percent**) who have done so have received one.

Slightly less than half (**44 percent**) have asked for a promotion, and more than two-thirds (**68 percent**) who have done so received one.

Working Parents

More than four out of ten working parents (**44 percent**, men; **42 percent**, women) would prefer to work, rather than stay at home, even if finances were not an issue.

Value of Experience

Nearly three out of four (**72 percent**) respondents report that experience is more important than education in their current jobs.

Work-related topics – further insights

Current Skills

The top three contributions that respondents believe they bring to their jobs are efficiency in completing tasks, a strong work ethic and the ability to learn new things (**56 percent**, **50 percent** and **44 percent**, respectively).

Future Skills

The most marketable skills in 2020 are believed to be the ability to multi-task, speak more than one language, be a team player and navigate most computer applications (**57 percent**, **54 percent**, **54 percent** and **53 percent**, respectively).

Job Satisfaction

Approximately half (**48 percent**) of respondents report they are satisfied in their current jobs.

Of those not satisfied, feeling underpaid was the primary reason for dissatisfaction (**37 percent**), followed by lack of opportunity for advancement (**25 percent**).
