

Accenture Security Overview 2022 (transcript)

Digitalization, cloud edge devices, and the internet of things. Remote work, hyper speed, and compressed transformation. It's a new world. One with more opportunities, more complexity, and more threats as the world changes, so must security. Together we must pivot quickly, scale seamlessly, and adapt confidently. Now more than ever security is a business imperative, a business accelerator. Accenture's approach is innovative, purpose driven, and business outcome focused. From smart homes and cities, to transportation, financial, and health systems, to supply chains, government services, and COVID vaccine distribution. We are there. Securing you every step of the way.

We provide visibility into risk across an entire organization, protect critical assets with the right controls and help organizations prepare for the cyber attacks of today, and tomorrow. We help businesses modernize by making security frictionless and proactive in the cloud, protecting data and automating controls for accelerated growth. Through innovative technology, we help clients scale security and compliance operations while managing risk and reducing costs. We help clients tackle unique industry specific challenges with tailored, purposeful solutions and strategies to position them securely now and into the future.

Across 200 cities and 19 industries we work as one team with a common goal. To create 360-degree value for our clients by harnessing the power of change. Accenture is securing the world through the promise of technology and human ingenuity. While the world may look different, together, we can help you confidently navigate change, securely.

Accenture.
